Address

8011 Abbott Ave, Miami
Beach, Florida, 33141

Profile

Experienced Full Stack JavaScript developer with strong experience building and maintaining web and mobile applications using a variety of technologies. Competent in frontend and backend development, with significant experience in frameworks such as React, React Native, Angular and Ionic. Proven track record of working in diverse environments, from freelance projects to large corporate teams. I am fluent in Spanish and fluent in English, with a strong commitment to continue learning and staying up to date with the latest industry trends and technologies.

Experience

Santander Bank Technology

July 2021 — April 2024

SSr Software Engineer Av. Juan de Garay 125, C1063 Cdad. Autónoma de Buenos Aires, Argentina

- Developed generic components for the bank's internal library, Flame-UI, ensuring accessibility according to W3C standards.
- Implemented micro-frontends and integrated them into various environments of Corporate and Individual Home Banking.
- Utilized technologies such as Angular, React, Redux, Styled-Components, and TypeScript.
- Participated in maintenance on-call shifts for Corporate Home Banking.

Freelance

February 2021 — July 2021

Full Stack JavaScript Developer Remote

- Managed complete development of various projects from conception to implementation.
- Focused on frontend development, collaborating on technology definition, time estimation, sprint planning, and client communication.
- Worked with React, React-Native, Svelte, Ionic, Node.js, Express.js, MongoDB, PostgreSQL and Firebase.

Telecom Argentina

October 2019 — February 2021

Full Stack JavaScript Developer 3940 Av. Congreso Buenos Aires, Cdad. Autónoma de Buenos Aires

- Developed and maintained an internal application for Telecom technicians using Ionic, Cordova, D3.js, Node.js, and MySQL.
- Led the migration of an admin panel from Angular to React, managing permissions and access zones for technicians.
